

## Endotoxin-free Water

Ultra-pure water for reconstitution and dilution of test samples and reagents (<0.001 EU/mL)

**EndoGrade<sup>®</sup> Water** is specially processed water for sensitive applications where low endotoxin levels are required. **EndoGrade<sup>®</sup> Water** is certified to contain less than 0.001 EU/mL and is ideal for preparing solutions and reagents for bacterial endotoxin testing and endotoxin removal.

## EndoGrade<sup>®</sup> Water at a Glance

- Ultra-purified water ideal for endotoxin-free reconstitution and dilution of samples and reagents used in bacterial endotoxin testing and endotoxin removal
- Certified endotoxin content of less than 0.001 EU/mL
- Convenient plastics bottles with screw caps
- Shelf life of 5 years from date of certification

## EndoGrade® Water - Specifications

Cat. No. 607100

- 16 bottles/pack
- Certified endotoxin-free water, <0.001 EU/ml

## EndoLISA®

Cat. No. 609033

Endotoxin Detection Assay based on ELISA-technology and Recombinant Factor C (rFC)

## EndoZyme® II

Cat. No. 890030

Recombinant Factor C (rFC) Endotoxin Detection Assay

## Endo-RS®

Cat. No. 609065

Endotoxin Recovery Kit - A Toolbox for Demasking Endotoxin in Pharmaceutical Formulations exhibiting Low Endotoxin Recovery (LER)

## EndoGrade® Glass Test Tubes

Cat. No. 800050

Endotoxin-free borosilicate glass test tubes with aluminium screw cap

Additionally Hyglos offers Endotoxin Detection Service including Hold Time Studies and Demasking Protocol Development applying state-of-the-art methods.
